DETAILED ACTION

Applicant's arguments in the Appeal Brief filed 15 September 2004 are found persuasive. Therefore, rejections to claims 1-14 are withdrawn.

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or make obvious:

- transferring a file system including folders and data files from a source data storage controlled by a source data processing unit to a destination data storage controlled by a destination data processing unit over a transfer medium including building a file object containing a data package, generating a descriptor file including parameters associated with the file object, generating an archive file including said data package and transmitting the descriptor file and the archive file to the destination data processing unit as recited in claims 1, 9, 12
- receiving in a destination storage controlled by a destination data processing unit a file system which is transferred from a source data storage controlled by a source data processing unit including reading a received descriptor file, defining a file object from information contained in the descriptor file, setting an environment parameter of the file object with a value from the descriptor file and unarchiving data associated with said file object contained in a received archive file and installing said data in the destination data storage as recited in claims 8, 11, 14

- Claims 2-7, 10, 13 being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
